

A wave of comfort,  
for outdoors and indoors.

# WAVE

The WAVE urban furniture line comprises three products that offer the same high level of comfort: a table, a bench with backrest and a bench without it. The load-bearing structure made of stainless steel provides a durable foundation and ease of maintenance. In terms of appearance, the furniture line character is defined by wood, which shapes the lines and provides an ideal seat – cool in the summer, warm in the winter. The seat is anatomically shaped to make the bench both comfortable and elegant. WAVE is a choice of comfort for outdoor areas and for public areas in large buildings.

High quality workmanship,  
easy installation and  
maintenance
